29 JUN 1970

MEMORANDUM FOR: Director of Scientific Intelligence

THROUGH :

[REDACTED]

SUBJECT : OSI Critiques of NPIC Reports

1. [REDACTED] sent us the results of the Nuclear Energy Division's review of the basic program for the past fiscal year, made at [REDACTED] request. We have reviewed these comments and wanted to thank you for this effort and for the constructive criticisms of your analysts.

2. It is rare that we have the benefit of such a comprehensive review of our products. We appreciate the time your people took to make these careful analyses of the reports. The critiques will be of continuing value to us in our attempts to make our reporting more responsive to customer needs.

3. We feel as you do that the continuing contacts between your analysts and our photo interpreters will also aid in making our reports fill your needs and those of the rest of the analytical community. We hope that OSI analysts will continue to make direct contacts with photo interpreters and we shall encourage our people to foster such contacts.
